

ReMarco Resolution

I have incorporated the **SC-1700** LCD Acuity System in my practice, and my experience with the product has exceeded my expectations. The contrast of the letters is incredible which makes it easy to view from any angle. The contrast testing is especially useful to assess the effects and progression of cataracts on my patients. We also appreciate having the ability to randomize the letters for patients who have memorized our charts. Overall, this is an attractive addition and an extremely beneficial upgrade for my practice. I look forward to additional and exciting innovations from Marco.
